## Brera

---

**Opt for  
added comfort**

Heating, sun-resistant  
screens, sliding walls,  
lighting, etc.

# Enjoy the extraordinary, all year round

Would you like to enjoy the outdoors for longer? Brera makes everything possible! Use Brera to add a seamless extension to your home or create a wonderful place in your garden to spend time in. Brera is unique in its class because its roof can slide completely open to allow as much light in as possible. Would you prefer more shade? As the roof closes, the slats tilt and filter the sunlight, ensuring optimum air circulation. That makes the area under a Brera slatted roof a pleasant place to sit during the summer months.

You can even add glass walls, led lighting and heating to this outdoor living space, so you can enjoy your patio for longer. Would you like to keep your outdoor living space at a comfortable temperature at all times and protect it against rain? Then sensors that automatically adjust the position of the slatted roof are a good choice.

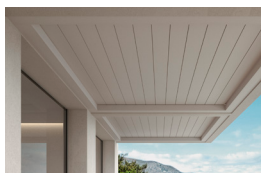

## Choose from the following options for added comfort:

- ◀ Dimmable led lighting (RGB)
- ◀ Heating
- ◀ Glass walls
- ◀ Sun-resistant screens
- ◀ Sensors (sun, rain, temperature and wind sensor)

### Slats

The slats connect to the gutter profiles that drain surplus water via the legs. That means less risk of water infiltration even if you tilt the slats.

### Design

The sleek, flat design of the slatted roof is best appreciated when it is fully closed.

### Maximum light during the winter months

If Brera is fitted to your home, you can open it fully for maximum sunlight indoors. Moreover, the folded slats do not block visibility in any way.

## Multifunctional terrace solution

Do you like to sit in the shade? Then tilt the slats for optimum air circulation and prevent any risk of overheating in the summer months. Would you like to enjoy warm winter sun? In that case, just open the sliding roof fully and let in all that sunlight and heat.

### Sunlight control

Slide the roof open for maximum sunlight.

### Air circulation

Adjust the airflow for your desired ventilation.

### Sunlight control & rain protection

Close the roof fully for complete protection against sunlight, UV radiation and rain.

# Premium quality

## Extraordinary bioclimatic outdoor life

### Installation

- ▶ The components are supplied pre-assembled as macro-elements for ease of installation.
- ▶ The drainage system is prepared and sealed where necessary to guarantee proper water drainage.
- ▶ The led lighting using the hand-held transmitter and the motors are all pre-programmed in the factory.
- ▶ The technical parts (transformers, control units, receivers and wiring boxes) are easily accessible.

### Maintenance

- ▶ Check that the drains are not blocked.
- ▶ The box and the slats are easy to clean using a mild soapy solution.

### Sustainable

- ▶ Energy consumption — for operating the ventilation, heating, lighting and cooling — is very low.
- ▶ The materials from which the Brera is made are 99% recyclable.
- ▶ The natural energy from the sun and wind (= control of the sunlight and air flow) makes the area under the Brera a pleasant place to spend time.

### Aesthetics

- ▶ The Brera products have a sleek and sober yet refined design.
- ▶ No visible fixings.
- ▶ Numerous options for even greater comfort: glass sliding walls, screens, heating, dimmable led lighting, etc.
- ▶ Available in all RAL colours and a wide range of paints and textured coatings, all at the standard price.

### Colours\*

#### 8 standard colours:

	Iron grey		White semi-gloss
	Corten		Ivory semi-gloss
	Grey sand		Silver grey
	White sand		
	Ivory sand		
<b>TEXTURED COATINGS</b>			

**Optional:** All RAL colours and a wide choice of textured coatings
